N.P.N. SEMI-ANNUAL SUBJECT INDEX

Of Technical and Semi-Technical Articles

JANUARY-JUNE, 1938

Index Number	Subject	Issue	Page
079.	**Patents on Methods and Devices**		
	Patent Literature in Refining Technology;		
	Straight Synthetic Lubricants, by J. H. Byers, Article VIII, Part 1	Feb. 9,	R-42
	Article VIII, Part 2	Feb. 23,	R-67
205.	**Miscellaneous Tests and Analyses of Petroleums, Gases, and Solid Bitumens from Particular Fields or Localities**		
	Effect of Carburetion and Manifolding on Anti-Knock Ratings in Multi-Cylinder Engines; by Earl Bartholomew, Harold Chalk, and Benjamin Brewster, Part I	Jan. 26,	R-31
	Part II	Feb. 9,	R-51
223.	**Hydrocarbon Compounds and Derivatives in Petroleum, Natural Gas, and Other Bitumens; Their Identification, Synthesis, and Reactions with Various Substances**		
	A Study of the Chemical Composition of Surakhan Gasoline, by P. S. Panutin and E. N. Firsanova	April 6,	R-160
230.	**Thermal Properties of Petroleum**		
	Fuel Research Pays Dividends, by A. L. Foster	Jan. 19,	R-21
231.	**Ignition Variables**		
	.6 Diesel Fuel		
	Grading Fuel Oil by Cetane Numbers...	June 15,	p. 20
234.	**Thermal Decomposition, or Cracking. (Pyrolysis)**		
	.3 Cracking Stills and Accessories		
	Cracking and Dewaxing Units Modernize Bradford Oil Refining Plant, by Arch L. Foster	April 6,	R-147
250.	**Power and Thermal Efficiency Tests**		
	New Diesel Fuel Test; Metallurgists Develop New Lubrication Principle, by Arch L. Foster	June 29,	R-305
262.	**Gaseous Products, Including Natural Gas**		
	Rapid Method for Low Temperature Fractionation of Gases, Vapors and Liquids, by F. N. Laird	Jan. 12,	R-3
265.	**Lubricating, Transformer and Switch Oils**		
	Properties Which Affect Lubricating Oil Performance, by H. M. Rugg	May 4,	R-224
268.	**Asphalts, Tars, Road Oils, Etc.**		
	Classifying Asphalts by Means of Penetration Index, by J. Ph. Pfeiffer and P. M. Van Doormal	Feb. 23,	R-78
422.	**Well Drilling Methods and Equipment in General**		
	.333 Water Supply for Boiler Purposes		
	Acid and Reactive Colloid for Water Treatment, by L. D. Betz	April 6,	R-167
605.	**Pipeline Transportation**		
	90-Lb. Natural Gasoline Handled by Pipeline of Humble Oil & Refg., by L. S. Wrightsman	Mar. 23,	R-115
625.	**Gas Pipeline Operation and Control**		
	90-Lb. Natural Gasoline Handled by Pipeline of Humble Oil, by L. S. Wrightsman	Mar. 23,	R-115
674.	**Oil Meters and Their Use**		
	90-Lb. Natural Gasoline Handled by Pipeline of Humble Oil, by L. S. Wrightsman	Mar. 23,	R-115
718.	**Combination Plants**		
	Combination Cracking Economics, by Eugene R. Smoley	May 4,	R-203
721.	**Distillation**		
	.3 Cracking Distillation		
	Cracking and Dewaxing Units Modernize Bradford Oil Refg. Plant, by Arch L. Foster	April 6,	R-147
	Richfield Oil's $5,000,000 Refinery Program Taking Shape, by J. N. Westsmith	May 4,	R-212
	Exact Control Features New Barnsdall Cracking Unit, by Arch L. Foster	June 15,	R-297
724.	**De-Sulphurizing**		
	35 Tons H_2SO_4 Per Day from Refinery Gases; Koppers Sodium Phenolate Process for Hydrogen Sulfide Removal, by G. M. Carvlin	June 1,	R-268
	Sulfide Removal with Organic Amines a Flexible Process; Girbotol Purification Process, by W. R. Wood and B. D. Storrs	June 1,	R-276
	Tri-Potassium Phosphate Process for Hydrogen Sulfide Removal; Shell Process, by T. W. Rosebaugh	June 1,	R-280
726.	**De-Colorizing**		
	.1 By Filtration Thru Fuller's Earth or Prepared Clays		
	Filtering with Bauxite Products Economies in Lube Processing	April 20,	R-195
729.	**Other Refinery Processes; Solvent Extraction and Dewaxing.**		
	Packed Contact Tower Efficient in Solvent Treating Penna. Lube Fractions, by B. L. Heath and D. B. Williams	June 29,	R-318
	.4 Hydrogenation Processes		
	Nickel Catalyst Hydrogenates Octenes to Yield 100-Octane Number Motor Fuels, by Shell Development Co. and Shell Chemical Co. Laboratories	June 15,	R-291
	.5 Electro-Chemical Processes		
	Electrolytic Plumbate Process for Treating Gasoline Described at WPRA, La.-Ark.-E. Texas Division, by Allen S. James	Mar. 23,	R-139
	.7 Gas Polymerization		
	Polymerization—Magic or Headache? (Editorial, by Arch L. Foster	Mar. 23,	R-113
	Trends in Refining Processes As They May Affect Natural Gasoline, by Arch L. Foster	May 18,	R-235
	Atlantic Refg. Polymerization Unit Cuts Crude Requirements 3 to 4%, by Arch L. Foster	June 1,	R-259
	.8 Solvent Extraction and Dewaxing		
	Cracking and Dewaxing Units Modernize Bradford Oil Refg. Plant, by Arch L. Foster	April 6,	R-147
732.	**Materials Used in Refinery Construction**		
	.4 Refractories and Heat Insulators		
	Refractory Selection for Cracking Furnace Calls for Compromise, by M. G. Van Voorhis	Jan. 26,	R-19

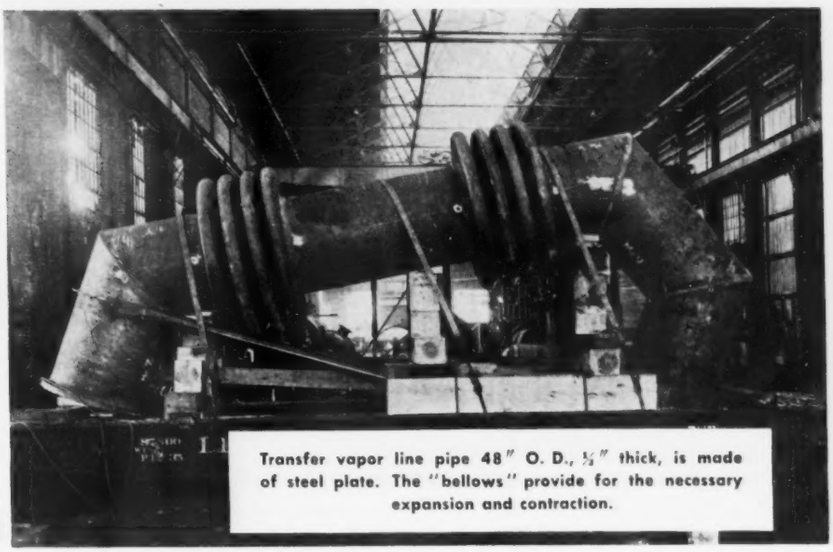
PIPING OF GRASS



Transfer vapor line pipe 48″ O. D., ½″ thick, is made of steel plate. The "bellows" provide for the necessary expansion and contraction.

PIPING of STEEL

Piping made of bamboo (a species of grass) has been used in Chinese oil refineries for over 1,000 years. In many of the older plants it is still used today.

Modern methods of refining necessitate the use of piping fabricated from special steels, able to withstand high pressures and temperatures, and extreme thermal variations.

The transfer vapor line pipe illustrated above is a recent example of special piping for refinery service fabricated in the Kellogg shops.

Whether you require piping for a single unit or an entire piping system a Kellogg engineer will gladly assist you.

KELLOGG

"Masterweld" pressure vessels for the Power, Refinery and Chemical Industries. Power Plant and Industrial piping. Heat Exchangers, Radial Brick Chimneys, Plastic Refractories. Cross, Holmes-Manley, de Florez and Tube and Tank cracking units. Gas Polymerization Units. Deasphalting, Dewaxing, Solvent Extraction, Acid Treating Plants, Absorption Plants and Pipe Stills.

OCECO Vents.. set the performance records!

• Oceco vents record their efficiency with black ink on the ledgers. They control tank breathing . . . prevent the free circulation of air . . . and minimize evaporation losses. On one test an Oceco vent saved losses of 2.42 bbls. of gasoline per day, yielded a return of more than $2900 from the $138.00 investment. Similar savings are an every day occurance with Oceco fittings. Equip your storage and barge tanks with Oceco vents. Standard sizes for any tank requirement and any pressure. Write for descriptive literature.

THE SCIENCE OF PETROLEUM

A Complete Encyclopedia of The World's Knowledge of Oil

SELDOM is it possible for a world industry to assemble, within the pages of a few volumes, all of the important facts of science, engineering and technology as written by the world's leading chemists and technologists. But this is what A. E. Dunstan, chief chemist of Anglo-Iranian Oil Co., has accomplished in his editorship of "The Science of Petroleum". Aiding Dunstan were three other prominent chemists and engineers, Prof. A. W. Nash, head of the department of oil engineering and refining, University of Birmingham, England; Dr. B. T. Brooks, one of the best known of America's chemical engineers and author of several technological works; Sir Henry Tizard, rector of the Imperial College of Science and Technology, London, and many other leading technologists.

This great encyclopedia is composed of 3200 pages covering 370 subjects. The first 833-page volume is devoted to geology and production engineering. Volumes 2 and 3 are devoted to properties of petroleum and its fractions. Volume 4 covers better utilization of products and the manufacture of products better suited to both new and old uses. The price of the four volumes complete is $85. Write to the book department
